Results-driven SQA Engineer with hands-on experience in automation testing, manual testing, and web application quality assurance. Skilled in developing robust test frameworks using Selenium, Cypress, Python, and Java. Proven expertise in executing sanity, regression, and release testing to ensure product reliability. Eager to contribute to innovative QA solutions and help organizations deliver high-quality, bug-free software products.

Professional Experience

11/2025 – Present

Mohammadpur, Dhaka,
Bangladesh

Software Test Engineer, Arif Academy

- Performed manual testing of LMS web applications to ensure quality.
- Identified and tracked defects through detailed bug reports.
- Executed Selenium-based automation for smoke and regression testing.
- Conducted performance testing to assess system stability.
- Collaborated with developers to verify fixes and enhance QA processes.

09/2024 – 09/2025

Dhaka, Bangladesh

Jr SQA Engineer, Quality Up Services

- Developed and maintained automation scripts using Selenium and Cypress.
- Used Git/GitHub for version control and collaborated via Azure Boards & Jira.
- Performed sanity, regression, and release testing for web and mobile apps.
- Logged defects with detailed steps, logs, and screenshots.
- Increased test efficiency and coverage through modular test cases.

04/2024 – 08/2024

Dhaka, Bangladesh

SQA Engineer Intern, Quality Up Services

- Assisted in executing manual test cases for web and mobile applications.
- Created detailed bug reports with logs, screenshots, and reproduction steps using Jira.
- Learned and practiced basic automation using Selenium and Cypress.

Education

07/2019 – 12/2023

Joyporhat, Bangladesh

Diploma in Engineering, Cybertech Polytechnic Institute

Diploma in Computer Engineering with core knowledge in programming, development, and networking.

Skills

Automation Tools

- Selenium
- Cypress
- Postman

Languages

- Python
- Java
- JavaScript

Frameworks

- Maven
- Cucumber
- Behave

DevOps & Tools

- GitHub
- Git Action
- Jenkins
- Jira

Manual Testing

- Test Case Development
- Regression Testing
- Sanity & Smoke Testing
- Bug Reporting

Other

- Linux Command Line
- JMeter
- K6

Certificates

Web Development with Python Django

Creative it institute

Freelancing with digital marketing

E-Learning & Earning LTD

Projects

GOOGLE TASK APP AUTOMATION

Python, Selenium & Behave

- Automated Google Tasks (create, update, delete) using Selenium WebDriver.
- Built BDD test scenarios with Behave for clarity and collaboration.
- Enhanced task management efficiency with stable end-to-end automation.

WINDOWS APP AUTOMATION

Java, Selenium, Maven & Cucumber

- Built an automation framework for Windows-based applications.
- Integrated Maven for builds and Cucumber for BDD reporting.
- Reduced manual effort by automating repetitive regression test cases.

WEBSITE AUTOMATION

Python, Java, Selenium, Maven & Behave

- Built a hybrid automation framework using Python (Behave) and Java (TestNG).
- Automated end-to-end web flows including login, forms, and data validation.
- Integrated Maven builds and parallel execution via Selenium Grid.
- Improved reporting and debugging using Allure and structured logging.
